Which noise band carries the network's density error? (2^16 sims)
RMSE of log p per row (nats)
10^{-1}
band: seed min–max
bimodal
gauss
student
★ trained everywhere except the t = 1 endpoint
10^{-1}
10^{0}
10^{1}
λ_c: trained network used only for noise λ > λ_c (oracle below)
